

Preschool Classroom Times

April 2024

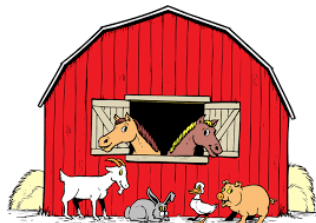

Mrs. Honchell & Mrs. Stempfley
Mrs. Watson & Mrs. Seals
Ms. Miller

Spring has sprung! There is so much taking place outdoors that it's a perfect time to learn about things that live in the great outdoors! After our Spring Break, we will start our study of zoo and farm animals, learn about different kinds of flowers, plants and hatch our own butterflies! We will also be wrapping up our letters of the week; W, V, Y and X. What an exciting time to be at school!

Block Center:

We will add Lincoln logs for building fences, a barn and animals for creating farms within our classroom. Children can also pretend they are visiting the zoo by creating exhibits and habitats with animals.

Sensory table will become a place to experience gardening and farming. We will add soil, seeds and gardening tools for kids

to play with. Mid-month, we'll switch out soil for sand and add farm tractors and animals

to help us explore the use of different farming equipment.

Art Center:

Art will continue to be one of our favorite centers with playdough, dot markers, water colors and painting.

Outside time:

We are hoping the March cold, clouds, and showers brings a warmer and sunnier April. Reminder: we go outside if it is 32° or warmer. Make sure to send a coat on those cooler days and remember to check your child's extra set of clothes too!

We look forward to a great April with your children!
